About Spetstekhmash Plant

Today Spetstekhmash Plant is one of the Russian leaders in manufacturing of equipment for military-industrial complex. Products manufactured by Spetstekhmash Plant are supplied to customers all over the Russian Federation, as well as to far- and near-abroad countries.

During many years Spetstekhmash Plant has been successfully cooperating with such government entities as Ministry of Defense, Ministry of Interior, RF Ministry of Emergencies, Federal Security Service, RF Federal Protection Service, Federal Penitentiary Service.

Integrating modern manufacturing technologies, implementing innovative developments of own design bureau and relying on its long-term experience the Plant has become one of the leading enterprises in Russia and near-abroad in the field of product manufacturing for power and law-enforcement agencies.

The existence of own design bureau is an undeniable advantage in creation and renovation of a product. Design bureau is engaged in research and advanced development (R&D) in order to implement new technologies in the manufacturing of products for military-industrial complex.

All the products manufactured by Spetstekhmash Plant passes tests and have appropriate certificates and licenses.

Spetstekhmash Plant successfully passed the attestation for compliance with international norms and standards of all enterprise business processes, which is confirmed by the certificate ISO 9001.

Plant produces multi-purpose and special-purpose equipment:

- Motor vans
- Tank trucks
- Means for cooking, storage and transportation of food and water in the field environment
- Technical means of protection of facilities and property
- Container bodies, mobile container units and variable capacity containers
- Household and care service units
- Interactive shooting galleries

Spetstekhmash Plant – keeping traditions we implement innovations
